

## Exercise Answer

The data at the end of the article reports infant deaths for:

Maryland - 493 in 2011, 458 in 2012

Baltimore metro area - 220 in 2011, 220 in 2012

When looking at the raw data, the infant mortality for 2011 and 2012 is unchanged, and yet the writer of the article proposes that programs have had a significant impact in the community.
